QuestionID : 12      Subject Name Database Technologies  
Using Oracle 9i

Q1. Oracle stores dates and time as two separate values.

**Correct Answer : F**

Your Answer :

QuestionID : 66      Subject Name Database Technologies  
Using Oracle 9i

Q2. CURSOR\_ALREADY\_OPEN is a predefined exception.  
It is raised Raised when you try to open an already open cursor.

**Correct Answer : T**

Your Answer :

QuestionID : 82      Subject Name Database Technologies  
Using Oracle 9i

Q3. !=, <>, ^= all denote same operation.

**Correct Answer : T**

Your Answer :

QuestionID : 93      Subject Name Database Technologies  
Using Oracle 9i

Q4. Char conserves memory as compared to varchar.

**Correct Answer : T**

Your Answer :

QuestionID : 99      Subject Name Database Technologies  
Using Oracle 9i

Q5. Which join causes SQL to supply a "dummy" row for rows not meeting the join condition?

1. Outer
2. NonEqui
3. Equi
4. Self

**Correct Answer : 1**

Your Answer :

QuestionID : 127      Subject Name Database Technologies  
Using Oracle 9i

Q6. Oracle stored procedures can only be written in PL/SQL

**Correct Answer : F**

Your Answer :

QuestionID : 133      Subject Name Database Technologies  
Using Oracle 9i

Q7. Any value added to NULL gives

1. the value itself
2. 0
3. NULL
4. unpredictable

**Correct Answer : 3**

Your Answer :

QuestionID : 137      Subject Name Database Technologies  
Using Oracle 9i

Q8. OCI stands for

1. Open Call Interface
2. Oracle Call Interface
3. Oracle Communication Interface
4. Oracle Connection Interface

**Correct Answer : 2**

Your Answer :

QuestionID : 152      Subject Name Database Technologies

Using Oracle 9i

Q9. The database files are fixed in size and never grow bigger than the size at which they were created

**Correct Answer : T**

Your Answer :

QuestionID : 163      Subject Name Database Technologies

Using Oracle 9i

Q10. View names are stored in the data dictionary in the table USER-VIEWS

**Correct Answer : F**

Your Answer :

QuestionID : 174      Subject Name Database Technologies

Using Oracle 9i

Q11. SQL is a procedural language.

**Correct Answer : F**

Your Answer :

QuestionID : 239      Subject Name Database Technologies

Using Oracle 9i

Q12. The set of possible values that a given attribute can have is called its-----

1. Range
2. Domain
3. Attribute
4. none of the above

**Correct Answer : 2**

Your Answer :

QuestionID : 249      Subject Name Database Technologies

Using Oracle 9i

Q13. The MODIFY command is used to change or modify data values in a table

**Correct Answer : F**

Your Answer :

QuestionID : 254      Subject Name Database Technologies

Using Oracle 9i

Q14. The most serious drawback in the ER model is that it can not depict relationships

**Correct Answer : T**

Your Answer :

QuestionID : 287      Subject Name Database Technologies

Using Oracle 9i

Q15. What is the use of SET SERVEROUTPUT ON COMMAND?

1. This is used for on server output  
2. if my PL/SQL program is not giving output then we are using this

3. Donot know
4. A and B both are correct

**Correct Answer : 4**

Your Answer :

QuestionID : 309      Subject Name Database Technologies

Using Oracle 9i

Q16. EXISTS,SOME,ANY are operators in SQL

**Correct Answer : T**

Your Answer :

QuestionID : 311      Subject Name Database Technologies

Using Oracle 9i

Q17. The data structure used in the Network model is -----& that used in the hierarchical model is -----

1. tree & link list
2. tree & graph
3. graph & tree
4. graph & link list

4. graph & link list

**Correct Answer : 3**

Your Answer :

QuestionID : 327      Subject Name Database Technologies  
Using Oracle 9i

Q18. PL/SQL supports overloading

**Correct Answer : T**

Your Answer :

QuestionID : 332      Subject Name Database Technologies  
Using Oracle 9i

Q19. LOG\_CHECKPOINT\_INTERVAL parameter is in this file?

1. init.ora
2. listener.ora
3. check.ora
4. tnsnames.ora

**Correct Answer : 1**

Your Answer :

QuestionID : 348      Subject Name Database Technologies  
Using Oracle 9i

Q20. LOB column can store only structure information

**Correct Answer : F**

Your Answer :

QuestionID : 350      Subject Name Database Technologies  
Using Oracle 9i

Q21. How many types of join are there

1. 3
2. 6
3. 5
4. 4

**Correct Answer : 4**

Your Answer :

QuestionID : 354      Subject Name Database Technologies  
Using Oracle 9i

Q22. Minus operator returns all distinct rows selected by first query.

**Correct Answer : T**

Your Answer :

QuestionID : 393      Subject Name Database Technologies  
Using Oracle 9i

Q23. Which SQL commands are used to create,modify and delete database structure but not data?

1. DDL
2. DML
3. DCL
4. DQL

**Correct Answer : 1**

Your Answer :

QuestionID : 399      Subject Name Database Technologies  
Using Oracle 9i

Q24. In SQL,which symbol is used for Remote access identifier?

1. @
2. %
3. \*\*
4. =>

**Correct Answer : 1**

Your Answer :

QuestionID : 450      Subject Name Database Technologies  
Using Oracle 9i

Q25. Oracle supports data integrity and concurrency for all LOBs  
Except

1. BLOB
2. CLOB

3. BFILE
4. None

**Correct Answer : 3**

Your Answer :

QuestionID : 461      Subject Name Database Technologies  
Using Oracle 9i

Q26. What is the difference between SQL99 and SQL3.

1. SQL99 is a predecessor of SQL3
2. SQL99 is a successor of SQL3
3. both are one and the same
4. none of the above

**Correct Answer : 3**

Your Answer :

QuestionID : 479      Subject Name Database Technologies  
Using Oracle 9i

Q27. All the constraints are stored in user\_constraints.

**Correct Answer : T**

Your Answer :

QuestionID : 498      Subject Name Database Technologies  
Using Oracle 9i

Q28. Review the statement

create view empinfo as select emp\_no,emp\_name,job from emp  
order by emp\_no,emp\_name

which clause causes an error?

1. as select emp\_no,emp\_name,job
2. order by emp\_no,emp\_name
3. create view empinfo
4. 1 & 2

**Correct Answer : 4**

Your Answer :

QuestionID : 530      Subject Name Database Technologies  
Using Oracle 9i

Q29. Group function can not be use in WHERE clause.

**Correct Answer : T**

Your Answer :

QuestionID : 551      Subject Name Database Technologies  
Using Oracle 9i

Q30. Oracle allows to create user defined data types

**Correct Answer : T**

Your Answer :

QuestionID : 562      Subject Name Database Technologies  
Using Oracle 9i

Q31. Database Triggers are PL/SQL that fire when an  
insert ,update or delete is performed on the table

**Correct Answer : T**

Your Answer :

QuestionID : 630      Subject Name Database Technologies  
Using Oracle 9i

Q32. A procedure declares a user defined exception but does not  
raise it explicitly which of the following statement is true about  
function.

1. The user defined exception will never be raised
2. the user defined exception will be handled by a WHEN  
OTHERS exception handler.
3. the procedure will fail on compile
4. the user defined exception is defined incorrectly.

**Correct Answer : 1**

Your Answer :

QuestionID : 659      Subject Name Database Technologies  
Using Oracle 9i

Q33. Truncate is a DDL command and delete is a DML command

**Correct Answer : T**

Your Answer :

QuestionID : 680      Subject Name Database Technologies  
Using Oracle 9i

Q34. State true or false. EXISTS,SOME,ANY are operators in SQL

**Correct Answer : T**

Your Answer :

QuestionID : 682      Subject Name Database Technologies  
Using Oracle 9i

Q35. DDL statements are allowed in PL/SQL code.

**Correct Answer : F**

Your Answer :

QuestionID : 686      Subject Name Database Technologies  
Using Oracle 9i

Q36. For update clause is required when the table has a primary key

**Correct Answer : F**

Your Answer :

QuestionID : 691      Subject Name Database Technologies  
Using Oracle 9i

Q37. A Sub-Query can not have a \_\_\_\_\_ clause and a \_\_\_\_\_ of selects.

1. groupby,For update
2. orderby,having
3. orderby,For update
4. orderby,groupby

**Correct Answer : 3**

Your Answer :

QuestionID : 728      Subject Name Database Technologies  
Using Oracle 9i

Q38. Modelling of relationship between a collection of entities and relationships is \_\_\_\_\_.

1. Relational Algebra
2. Relation schema
3. Aggregation
4. Relationship set

**Correct Answer : 3**

Your Answer :

QuestionID : 768      Subject Name Database Technologies  
Using Oracle 9i

Q39. A function or procedure can return only one value to calling PL/SQL code block.

**Correct Answer : F**

Your Answer :

QuestionID : 800      Subject Name Database Technologies  
Using Oracle 9i

Q40. The INSTEAD OF trigger works at

1. Row level
2. Table level
3. Schema level
4. Database level

**Correct Answer : 1**

Your Answer :

QuestionID : 804      Subject Name Database Technologies  
Using Oracle 9i

Q41. Which of the following statement is true about implicit cursors

1. implicit cursors are used for SQL statements that are not named.
2. implicit cursors are no longer a feature in oracle
3. both

3. some

4. all

**Correct Answer : 1**

Your Answer :

QuestionID : 820      Subject Name Database Technologies  
Using Oracle 9i

Q42. ON DELETE CASCADE is option for Foreign key.

**Correct Answer : T**

Your Answer :

QuestionID : 827      Subject Name Database Technologies  
Using Oracle 9i

Q43. A table is in first normal form if . . .

1. there are no repeating groups.
2. all the key attributes are defined.
3. all attributes are dependent on a primary key.
4. all of the above.

**Correct Answer : 4**

Your Answer :

QuestionID : 842      Subject Name Database Technologies  
Using Oracle 9i

Q44. Production database run on non-archive mode

**Correct Answer : F**

Your Answer :

QuestionID : 857      Subject Name Database Technologies  
Using Oracle 9i

Q45. select LOG(10,100) from dual returns "Log base 10 of 100"

**Correct Answer : T**

Your Answer :

QuestionID : 906      Subject Name Database Technologies  
Using Oracle 9i

Q46. when you create a synonym, when does oracle check for the validity of the object for which you are creating the synonym?

1. at the time of before creation of the synonym
2. after creation of the synonym
3. when the object is accessed via the synonym
4. only when you alter the synonym

**Correct Answer : 3**

Your Answer :

QuestionID : 910      Subject Name Database Technologies  
Using Oracle 9i

Q47. the wild card character % used in strings means

1. any number of characters
2. one or more characters
3. at least one character
4. at least one alphabet

**Correct Answer : 1**

Your Answer :

QuestionID : 920      Subject Name Database Technologies  
Using Oracle 9i

Q48. Oracle database includes which of the following segments-

1. Data segment
2. Index segment
3. Code Segment
4. both 1 and 2

**Correct Answer : 4**

Your Answer :

QuestionID : 931      Subject Name Database Technologies  
Using Oracle 9i

Q49. segment is a specific number of contiguous data blocks and a extent is a collection of segments.

**Correct Answer : F**

Your Answer :

QuestionID : 955      Subject Name Database Technologies

Using Oracle 9i

Q50. In case of LOB types in PL/SQL ,the internal object store a -  
--- in the large object column of a table.

1. Pointer to Bfile
2. Locator to BLOB or CLOB
3. Both
4. None

**Correct Answer : 2**

Your Answer :
